GENERAL NOTES:

1. This section contains a general description of the work and procedures required to be performed to ensure the successful completion of the project. It includes a list of materials, equipment, and labor required to carry out the work.

2. The work shall be performed in accordance with the specifications and drawings provided by the owner. All work shall be done in a neat and professional manner, and all materials shall be handled with care to prevent damage.

3. The work shall be completed in accordance with the schedule provided by the owner. Any delay in the completion of the work shall be reported to the owner in writing.

4. The work shall be performed in a safe manner, and all safety regulations shall be followed. Any accidents or incidents shall be reported immediately to the owner and the appropriate authorities.

5. The work shall be subject to inspection by the owner or their representative. Any deficiencies shall be corrected at the owner's expense.

6. The work shall be guaranteed for a period of one year from the date of completion.

DIVISION OF RESPONSIBILITY:

1. The owner is responsible for providing the work, materials, and labor necessary to complete the project.

2. The contractor is responsible for performing the work in accordance with the specifications and drawings provided by the owner.

3. The owner shall be responsible for paying the contractor for the work performed.

4. The contractor shall be responsible for ensuring that all work is performed in a safe and professional manner.

5. The owner and contractor shall work together to ensure the successful completion of the project.

DESIGN NOTES:

This section provides additional details and specifications for the project. It includes a list of materials and equipment required to carry out the work.

BILL OF MATERIAL:

This section lists the materials and equipment required for the project. It includes a breakdown of the costs associated with each item.

NOTE: The above information is subject to change and may be revised as necessary.

Page 1100-37, subsection 114A.3. Add to this subsection:

- Riprap Base (Channel Riprap)

Page 1100-37, subsection 114A.4. Add to this subsection:

1. Base for Riprap Base (Channel Riprap)

(2) Class. Provide the class for installation as specified in the Contract Documents.

(3) Quality:

- Specific Gravity (G.S.D.), min. (CT-7, Procedure 5) ......................................................3.37
- Soundness, minimum (CTNS-11) .................................................................6.65
- Wt. maximum (CTMB-32) .................................................................4% (ugh)

(4) Product Control:

- Erosion Resistance: Provide means for keeping the area free from wash, waves, debris, or other easily dislodged material that may cause erosion of the installed riprap.
- Size: The class requirements are given in TABLE 114A-3.

J. Building for Channel Riprap:

(1) Construction. Provide a channel or device that will support and guide the fiber cement material as specified in the Contract Documents.

(2) Quality:

- Specific Gravity (G.S.D.), min. (CT-7, Procedure 5) ......................................................3.30
- Soundness, minimum (CTNS-11) .................................................................6.85
- Wt. maximum (CTMB-32) .................................................................4% (ugh)

(3) Product Control:

- Size: The permissible limits are given in TABLE 114A-7.
